

Ascom Hasler
Mailing Systems, Inc.

ascom Hasler *Now you've got a better choice.*

October 23, 1994

To whom it may concern:

I am an electronics design engineer employed by Ascom Hasler Mailing Systems. I have worked closely with MicroTools (Joseph Lehman and Bob Japenga) over the last 2 years on the development of a new line of electronic postal scales, for which MicroTools contracted to write the software.

I found MicroTools to have an excellent understanding of electronic hardware, as well as, software. They had numerous good ideas regarding hardware functionality which I incorporated into the design. Their depth of understanding of electronic components was displayed during the hardware debug stage of the project, in which we spent numerous hours troubleshooting prototypes. MicroTools did an excellent job writing production test software which thoroughly tested the hardware. They took the initiative to do much more than outlined in my brief specification and provided me with good documentation.

MicroTools is excellent technically, communicates well, and works good in a team environment. I highly recommend them and hope to work with them again soon.

Best Regards,
Allen Crowe
